## **Who We Are**

Ortho Development Corporation is a medical device design, manufacturing, and sales company. We develop and market orthopedic implants and surgical instrumentation for knee and hip replacement, trauma fracture repair, and spine treatment. The company was founded in 1994 and is located in the Salt Lake City suburb of Draper, Utah. Ortho Development is passionate about making the best, clinically-proven, high-performance orthopedic devices in the world.

## **Ownership**

Ortho Development is a privately held company. Our majority shareholder is Japan Medical Dynamic Marketing—a publicly-traded, Japanese medical device distribution company. Japan MDM has sales offices in ten major cities and a presence in more than 1,700 hospitals throughout Japan.

## **Evolutionary Innovation**

Our product development philosophy is to make unique refinements to the best, clinically-proven technologies. We believe in empowering surgeon choice and collaborate with skilled orthopedic surgeons to design and develop high-performance product solutions that will help advance patient care.

## **Manufacturing**

Ortho Development implants are manufactured with pride in the United States using the most advanced materials, latest technologies, and a strong commitment to quality. All product is inspected, cleaned, packaged, and shipped from the company's headquarters in Draper.

## **Distribution**

Ortho Development products are distributed through a network of more than 50 independent distributors, including Japan MDM. Our products are being used by hundreds of surgeons—at world-renowned orthopedic hospitals and teaching universities, and in a widespread number of regional and community hospitals.

## Knee Systems

Ortho Development's comprehensive total knee portfolio includes primary and revision systems. Our foundation product, the Balanced Knee System, has more than 14 years of clinical success with more than 50,000 implanted worldwide. All instrumentation has been designed to enhance reproducibility in the hands of every surgeon.

## Hip Systems

Ortho Development's primary hip replacement systems offer a selection of femoral stems and acetabular components. The implants and instruments provide surgeons with options to accommodate multiple surgical approaches and treat a wide range of patient anatomy.

## Spine Systems

Ortho Development's spine products include implants and instruments for lumbar fixation and anterior cervical disc fusion. The primary focus for spine product development is the Japanese market.

Pagoda® Pedicle Screw System

Vusion® CS Plus

Envision® Cervical Plate

## Trauma Systems

Ortho Development's trauma products are currently offered only in Japan\*. The portfolio includes a full line

MODE® Fracture Plates

of plates and screws for the fragility fracture market along with compression hip screws.

\*Not approved for sale in the U.S., available only in Japan.

Ortho Development is passionate about orthopedics and dedicated to improving lives. Our vision is to provide the best customer experience in orthopedics through our premium, clinically-proven products, coupled with small-company service and value. We think you will notice the Ortho Development difference.
